SCIENTIFIC PROCEEDINGS

FOUNDED IN 2003

Issue 13

L'viv 2015

CONTENTS

Zelisko V. R., Kuchma M. I. On the existence of unique solutions of linear matrix equations over rings with involution.....	7
Shavarovskii B. Z. About nonsingular solutions of one type of the systems of matrix equations	11
Styopochkina M. V., Chervyakov I. V. The number of partially ordered sets which are (min, max)-equivalent to the set (1, 2, 7).....	18
Lozynska V. Ya. On convolution in algebra of polynomial ω -ultradistributions of Beurling type with compact supports	22
Holubchak O. M. Operators of symmetric shift in Hilbert space of symmetric analytic functions.....	31
Romaniv O. M., Sagan A. V. Noncommutative ω -Euclidean rings	36
Bilous A. M., Gatalevych A. I. Simultaneous reduction of pairs of matrices over everywhere adequate duo-ring	40
Pihura O. V. Maximal non-Gelfand ideals of commutative Bezout domain.....	47
Popovych R. B. Restrictions on the order of elements in Conway towers of finite fields	53
Andriychuk R. M., Kit H. S. Axisymmetric stationary temperature field in bimaterial body with heat generation on a circular domain	58
Nykolyshyn M. M., Osadchuk V. A., Prokopovych I. B. General approach to modeling and determination of the residual stresses	63
Nemirovsky Yu. V., Romanova T. P. Dynamic behavior of reinforced square plates with mixed support conditions under thermal and force loading	74
Kunets Ja. I., Matus V. V., Mischenko V. O., Porokhovskiy V. V. Scattering of a SH-wave by an elastic fiber with thin peaked interphase inclusion of low rigidity	82
Popovych V. S., Rakocha I. I. The mathematical modelling and investigation of the thermostressed state of the five-layered thermosensitive hollow cylinder	88

Protsyuk B. V. Determination of thermoelastic state of piecewise inhomogeneous thermosensitive hollow cylinder	101
Lozynskyy Yu. Y., Tokovyy Yu. V. Thermal-stress analysis of an elastic strip under given displacements of its sides	111
Zelenyak V. M. Thermal stresses in semi-infinite plate with arbitrarily oriented edge crack due to heat source	117
Sukhorolsky M. A., Dostoina V. V. Systems of solutions of Helmholtz equation in a complex domain	122
Opanasovych V. K., Slobodyan M. S., Bilash O. V. On one approach related to the study of the stress-strain state of piecewise homogeneous isotropic plate with a crack under bending considering the width of the contact area of its faces	127
Kozachok O. P., Slobodian B. S., Martynyak R. M. The effect of an ideal gas in interfacial gaps on the contact between two elastic bodies with wavy surface relief	135
Artemiuk V. Yu., Kalynyak B. M. Characteristics of the material in inhomogeneous in the radial direction hollow sphere under thermal loading which ensure zero radial stresses in it	141
Turii O. P. Heat transfer through contact surface between two media taking into account the influence of thermal radiation	149
Kravchyshyn O. Z. The iteration method for determination of the angles of reflection/refraction of SH-wave under interaction with the inhomogeneously deformed elastic layer	156
Postolaki L. I. Study of stress concentration in the neighborhood of the fixed end of the cylinder under axial stretching using the variational method of homogeneous solutions	163
Senkiv L. M. Determination of stresses in nonhomogeneous spiral weld zone in the pipeline	168
Romaniv A. M. On the Smith normal form of the greatest common divisor of one class of matrices	174
Marchuk M. V., Pakosh V. S., Kharchenko V. M. Thermoelastic state of uniformly heated hinged on the ends of the lower front plane of composite plate-strip	182
Shchedryk V. P. The value of matrix on a system of roots of diagonal elements of matrix and its properties	187
Dziakovich D. A. On symmetries of universal multipoint invariants underlying elementary geometries	195
