FOUNDED IN 2003

Issue 10

L'viv 2012

CONTENTS

Ptashnyk B. Yo., Repetylo S. M. The Dirichlet–Neumann type problem for system of partial differential equations with constant coefficients	7
Ilkiv B. S., Strap N. I., Voljanska I. I. Nonlocal boundary value problem for equation with differential operator $z \partial/\partial z$ in the complex domain	15
Derevianko T. A., Kyrylych V. M., Peliushkevych O. V. The problem with movable boundaries for degenerate hyperbolic system of quasilinear equation	27
Chernega I. V. Symmetric analytic functions on ℓ_p	47
Dzhaliuk N. S., Petrychkovych V. M. The solutions of matrix polynomial diophantine equation	55
Shavarovskii B. Z. Canonical form for pair of matrices, in which one matrix has all pairwise relatively prime elementary divisors of degree at most two	62
Zabavsky B. V., Bilavska S. I. Weakly global dimension of finite homomorphic images of commutative Bezout domain	71
Zelisko H. V. Principal flat ideals in the ring of matrices over commutative elementary divisors domain	74
Romaniv O. M. Elementary reduction of matrices over Bezout ring with n -fold stable range 1	77
Gatalevych A. I. Reduction of third order matrices over Bezout ring of stable rank 2	80
Sorokin O. S. Stable range of generalized adequate ring	82

Brydun V. L., Zarichnyi M. M. Probability measure monad in the category of non-archimedean coarse spaces	86
Kholyavka Ya. M. Simultaneous approximation of values of two Jacobi elliptic functions	90
Melnyk I. O., Komarnytskyi M. Ya. Differentially multiplication modules and their differentially prime spectrum	93
Pukalsky I. D. Nonlocal parabolic problem and optimal control problem for linear equations with degeneration	102
Kit H. S., Andriychuk R. M. Stationary heat conduction problem for piecewise uniform space with heat emission in circular domain	115
Demydyuk M.V., Lytwyn B. A. The problems of human gait mathematical modeling subject to biomechanical experimental data	123
Popovykh V. S., Yanishevsky V. V. The linearization parameters method in thermoelastic problem of a thin thermosensitive hollow disk	135
Pyanylo Ya. D., Lopuh N. B. Research of transitive times and coordination of boundary conditions at non-stationary gas motion in the pipeline	147
Nykolysyn T. M. Orthotropic elastico-plastic closed cylindrical shell with two transverse surface cracks	152
Shevchuk V. A. Determination of residual stresses in cylinder with thin multilayer coating ...	159
Kalynyak B. M. Reduction of the elasticity problem in inhomogeneous rectangular domain to integral-differential equations	168
Lesyk O. F., Marchuk M. V., Pakosh V. S. Influence of transversal compression on spectrum of longitudinal natural frequencies of plates-strips	172
Vahin P. P., Shot I. Ya. On free vibrations of shells amenable to shear and compression	177
Slobodeniuk T. I. Elastic waves fields in 3-D matrix with volumetric inclusion	185
Tvardovska S. R. The interaction of longitudinal and transverse plane mechanoelektromagnetic waves in a porous medium in an external constant electric field	191
Revenko V. P. Investigation of the 3d stress state of the square prism with a circular hole, under action of the uniaxial loading.....	198
Vlasij O. O., Tatsij R. M. Approximation of solutions of generalized correct differential systems	205
Yartemyk V. V. The influence of the depth figuration of non-through crack on the stress state of elastic-plastic orthotropic shell	213
Yanishevsky V. S., Feshchur R. V. About the method of solution an option price equation in the Heston model	221
