C O N T E N T S

Anatolij Mykhaylovych Samoylenko
(on the 70-th anniversary) 5

Leonid BEDRATYUK, Stepan BEDRATYUK
A complete system of covariants for the binary form of the eighth degree 11

Yaroslav BIGUN
The averaging of initial and boundary-value problems with linearly transformed argument 23

Andriy DOROGOVTSEV, Mykhaylo POPOV
On narowness of conditional expectation operators in spaces of measurable function 36

Olga IZYUMTSEVA
On the local time of self-intersection for wiener process generated by a singular measure 47

Olena KARLOVA
Extension of mappings with values in non metrizable spaces 62

Bogdan KYSHAKEVYCH, Anatoliy PRYKARPATSKY,
Ivan P. TVERDOKHLIB
Associated Markov processes method for studying the competitive stocks market models with bi-variant quality function within bank portfolio 69

Vasyl' KOSOVAN, Volodymyr MASLYUCHENKO
On the polynomiality of separately polynomial maps on products of complex Banach spaces 89

Iryna KRASIKOVA
On the spectrum of a narrow operator in Köthe function spaces ... 97

Mykhaylo LENYUK, Oleg LENYUK
Introduction of hybrid integral transformation of Bessel-Euler-Legendre type on the polar axis 102

Oleksandr LEONOV
On filter cluster points of sequences 117

Taras LUKASHIV
Approximative synthesis of optimal control of systems of stochastic differential-functional Ito-Skorokhod equations with a small parameter 126

Igor MALYK
About existence and uniqueness of the strong solution of the stochastic integro-differential equation of Volterra with Skorokhod integral 135

Oleksandr MASLYUCHENKO
The construction of ω-primitives: the oscillation of sum of functions 151

Volodymyr MYKHAYLYUK, Violetta KHOLOMENYUK
Sequences of Rademacher type functions in L_1 164

Vasyl' NESTERENKO
Weak horizontally quasicontinuity 177

Oleksiy RUDENKO
Ito-Wiener expansion and properties of local time for gaussian random field 183

Yaroslav STASYUK
On the Dirichlet series with monotonous coefficients and the finality of description of the exceptional set 202

Mykhaylo SUMARYUK
Free semigroups generated by analytical functions 208

Anton YASHCHUK
Ito-Wiener expansion for stopping times 215

Amaria ARARA, Mouffak BENCHOHRA
Existence results for the Darboux problem for hyperbolic differential inclusions in Banach spaces 225

Mykola BILOTSKYY, Mykola CHERNIKOV
On subgroups of infinite index 242

Mykola CHERNIKOV
Groups with the weak minimal condition for nonabelian subgroups 249

Oleg NYKYFORCHYN
Fractal capacities and iterated function systems 259

Oleksandr SAVCHENKO
Normal functors in the category of ultrametric spaces 274

Sadulla TASHPULATOV
Investigation of spectrum and bound states of the energy operator of two-magnon system in a non-Heisenberg ferromagnetic with spin $s = 2$ and nearest-neighbor interactions 284

Oksana SHUKEL', Mykhaylo ZARICHNYI
Asymptotic dimension of symmetric powers 304
