

## C O N T E N T S

- Tamara ANTONOVA, Ol'ha SUS'  
 On the properties of sequence of figure approximants for two-dimensional continued fractions special form with real elements 5
- Andriy BOBYLIAK  
 Method for finding optimal strategy of Markov decision process based on properties eigen vector . . . . . 17
- Oksana BODNAR, Mykola ZABOLOTSKYI  
 Functions of slow varying equivalency . . . . . 26
- Andriy VUS, Myroslava MOROZ  
 Boundness of solutions for the system of differential equations with impulse action . . . . . 32
- Nataliya HOYENKO  
 Correspondence principle and convergence of sequences of analytic functions of several variables . . . . . 42
- Nadiya HRYNTSIV  
 An inverse problem for a weakly degenerate parabolic equation in the domain with free boundaries . . . . . 49
- Halyna DATSIV  
 Numerical solution of the linear axisymmetric sloshing problem in domain with baffles . . . . . 66
- Nataliya DZHalyuk, Vasyl' PETRYCHKOVYCH  
 Factorization of cell-diagonal and cell-triangular matrices over principal ideal rings . . . . . 79
- Yaroslav YELEIKO, Yuriy ZHERNOVYI  
 Stationary characteristics of the single-server queueing loss system with falling out possibility of the working server . . . . 90
- Andriy ZAGORODNYUK, Iryna CHERNEGA  
 Algebra of symmetric analytic functions on a polydisk of  $\ell_1$  . 100
- Volodymyr IL'KIV, Tetyana MAHEROVSKA  
 Nonlocal multi-point problem for high order strong hyperbolic equation . . . . . 107
- Petro KALENYUK, Ihor KOHUT, Zinoviy NYTREBYCH  
 On a null space of the problem with nonlocal two-point condition for partial differential equation . . . . . 116

- Olena KARLOVA, Oleksandr MASLYUCHENKO,  
Volodymyr MASLYUCHENKO  
Geodesic connected spaces and uniform limit of the Baire one  
functions . . . . . 129
- Pavlo KONONCHUK, Bohdan KOPYTKO  
About Feller semigroup that describes a diffusion process on  
a half-line with nonlocal boundary conditions . . . . . 134
- Kateryna KOPORKH  
Properties of the space of quotient maps . . . . . 144
- Ivan KSHANOVSKYY  
Growth of analytic functions of finite  $\lambda$ -type in a punctured  
plane . . . . . 152
- Oleh LYTVYN  
The interpolation of the ordinary differential operators . . . . 163
- Yuriy LOVEYKIN  
Perturbation of invariant tori that foliate the central manifold  
of conditionally integrable locally hamiltonian systems . . . . 177
- Vira LOZYNSKA  
Functional calculus for the Legendre differential operators . . 193
- Oksana MEDVID  
The integral problem for loaded partial differential equations . 201
- Yaroslav MYKYTYUK, Natalya TRUSH  
Asymptotics of zeros for some entire sine-type functions acting  
in a Banach algebra . . . . . 214
- Volodymyr MYKHAYLYUK  
The Baire classification of partial derivatives . . . . . 220
- Andrij NOVOSJADLO  
To a problem about construction of diffusion process which  
supposes generalized vector of transposition and matrix of  
diffusion . . . . . 227
- Serhiy PIDKUYKO  
On denseness of the set of nonintegrable hamiltonians of reduced  
three-body problem with pairwise interaction potential . . . . 242
- Petro PUKACH  
The mixed problem for the equation of beam vibrations type  
with perturbed linear operator in unbounded domain . . . . . 248

- Tetyana SALO, Oleh SKASKIV  
On the maximum modulus and maximal term absolute  
convergent Dirichlet series . . . . . 264
- Grygoriy TORBIN  
Probabilistic approach to transformations preserving the fractal  
dimension . . . . . 275
- Ulyana FEDUS  
Identification of the coefficient near the time derivative in  
quasilinear parabolic equation . . . . . 284
- Stepan SHAKHNO  
Secant method under the generalized Lipschitz conditions for  
the first-order divided differences . . . . . 296
- Lidiya BAZYLEVYCH  
Hyperspace of compact bodies of constant width on sphere . 304
- Igor CHYZHYKOV  
On minimum modulus of bounded analytic functions . . . . . 318
- Zdzisław KAMONT  
Stability of nonlinear difference functional equations on  
unbounded domains . . . . . 329
- Yaroslav KHOLYAVKA  
On transcendence of modulus of Jacobi elliptic functions . . . 353
- Anatoliy PRYKARPATSKY  
A Borsuk–Ulam type generalization of the Leray-Schauder  
fixed point theorem . . . . . 360
- Natalia PRYKARPATSKA, Eugeniusz WACHNICKI  
The characteristic method and the related fixed point problem  
analysis of a Hamilton–Jacobi type equation . . . . . 375
- Mykola PRYTULA, Yarema PRYKARPATSKY,  
Mykola STARCHAK  
Computer simulation of the sine-gordon exact solitons and  
soliton collisions . . . . . 399
- Oksana MEDVID, Mykhaylo SYMOTYUK  
The problem with integral conditions for linear systems of  
partial differential equations with delay . . . . . 414

Mykola BOGOLUBOV, Jr., Anatolij PLICHKO, Anatoliy PRYKARPATSKY On ethics of collaboration and co-authorship in scientific pub- lications: Pandora's box or happiness of creation . . . . .	428
Omelyan BOBYK, Mykola PRYTULA, Bohdan PTASHNYK, Pavlo KHOBZEI Volodymyr Levytskyi the prominent ukrainian mathematician and enlightener (on the 135-th anniversary) . . . . .	440
Volodymyr IL'KIV, Volodymyr PELYKH Bohdan Yosypovych Ptashnyk . . . . .	451
Halyna PASICHNYK Stepan Dmytrovych Ivasyshen . . . . .	456
Contents on Language of the article's original . . . . .	462
Contents in English . . . . .	466
